

Assistant/Associate Professor in Hospital Logistics and Operations

The Department of Biomedical Engineering at the Universidad de los Andes in Bogotá, Colombia, seeks to fill a full-time position at the Assistant or Associate Professor level in basic and/or translational research in Hospital Logistics and Operations. Applicants with research interests in Hospital Logistics and Operations are encouraged to apply.

The applicant must possess a PhD in Biomedical Engineering or related areas, preferably with postdoctoral experience and a successful track record of scientific productivity. The candidate will be expected to promote and lead research projects in his/her area of expertise, write grants, collaborate and network with national and international colleagues, demonstrate superior organizational, time management, communication skills, and the ability to work both independently and as part of a multidisciplinary team. The candidate should be comfortable teaching large and small groups and meeting with students both in the classroom and at office hours.

The successful candidate will be expected to lead and teach undergraduate and graduate level mandatory courses and electives in his/her area of expertise. The expected teaching load will be 2 courses per semester. The candidate will advise undergraduate, masters and doctoral students with interest in Hospital Logistics and Operations. The candidate should also be able to guide research activities in synergy with other Faculty members in the Department and in close collaboration with the University's associated centers and Departments. The successful candidate will be expected to start on August 2019.

Universidad de los Andes is ranked among the top universities in Latin America. The School of Engineering has eight ABET-accredited programs. The Department of Biomedical Engineering has collaborations within and across disciplines in engineering, biology and medicine. The Department has strong clinical partnerships with national and international universities and medical institutions. The successful candidate will have access to laboratory spaces and high technology equipment. The Biomedical Engineering Department was established in 2011 and possesses a very dynamic and rapidly growing academic environment. The University offers diverse sources of financing for professors and graduate student research.

Interested candidates should send a curriculum vitae, a description of her or his research program, and a teaching statement (as a single PDF) to the following email address: jucordov@uniandes.edu.co

Applications should be received by March, 2019, to receive full consideration. Preferred candidates will then be asked to submit letters of recommendation and copies of recent publications. For additional information applicants are encouraged to visit our website at <https://ingbiomedica.uniandes.edu.co/>
